

MTRE 1000 Introduction to Mechatronics Engineering Spring 2019

Instructor

Kevin McFall (lecture), **Meiling Sha** (laboratory Tuesday), **Ali Barenji** (laboratory Monday and Wednesday)
E-mail: kmcfall@kennesaw.edu, rsha@kennesaw.edu, abarenji@kennesaw.edu
Office Phone: 470-578-5136
Cell phone: 610-573-6242
Office Location: Q 322
Office Hours: 11 am – noon MTWRF

Course Description

Catalog Description

An introduction to career opportunities in Mechatronics Engineering; familiarization with college and departmental policies, curriculum, and facilities.

Course Details

Term: Spring 2019
Course name: Introduction to Mechatronics Engineering
Course number: MTRE 1000
Section numbers: 01, 02, 03
Meeting times: Lecture R 5:00-5:50 pm
Laboratory M 12:30-3:15 pm (02), T 5:00-7:45 pm (01), W 12:30-3:15 pm (03)¹
Room number: Lecture Q106 and laboratory Q118

Learning Outcomes

By the end of this course, students will:

- appreciate the fundamental components that make up mechatronics engineering systems.
- undertake independent research, analysis, and design to creatively solve engineering problems.

Topics covered

- The engineering profession, education in engineering, and introduction to design.
- Engineering solutions and representation of technical information.
- Engineering measurements, estimates, dimensions, units and conversions.
- Technical topics such as energy, statics, strength of materials, circuits, and controls.

Required Materials

No textbook is required for this course.

All students are required to wear safety glasses at all times in the laboratory. Safety glasses will be provided to students at the beginning of the semester, but students having lost their pair are responsible for replacements.

¹ Teams needing extra time to work on their projects are welcome to visit the other lab sections (with the understanding instructors will prioritize helping that section's students) as well as during lab open times Tuesdays 11:00 am – 2:00 pm and Thursdays 5:00 pm – 8:00 pm (with the understanding the student lab assistant may offer limited assistance).

Teams

Most assignments in this course will be completed in teams that will be assigned in the second week of classes. The intention of the teams is to create a close-knit study group. All assignments with calculations, and the entire robot project will be completed in teams. All team members are expected to contribute equally to the teams. Students not pulling their weight will be given a warning once and thereafter will be assigned zero grades for subsequent assignments unless their activity level increases to an acceptable level.

Robotics kits will be checked out to each team. **No student is permitted to access any kit other than the one assigned to their team.** Each team must verify the contents of their kit in the beginning and end of the semester. Teams failing to check out their kits with the instructor will receive half points on the first project assignment, and will be assigned an incomplete grade for the course if the kit is not checked back in at the end of the semester.

Course Communication

Course material will be disseminated in D2L including lecture notes, homework assignments, etc. All official course announcements, including instructions when class may be cancelled, will be posted in the D2L course news. Be sure to check D2L regularly.

All Kennesaw State University computer labs provide free use of computers running these applications. Refer to <http://uits.kennesaw.edu/support/labhours.php> for locations/hours of computer labs.

KSU provides technology training and support for students. Use this support for issues with any of the standard campus technologies (such as D2L, KSU wireless, student email, etc.). Students can contact KSU's Technology Services in several ways:

- Email: studenthelpdesk@kennesaw.edu
- Call: 770-499-3555
- Walk-in support: See <http://uits.kennesaw.edu/support/> for times and locations

Late/Missed Assignments and Attendance

In general, late and improperly submitted assignments are not accepted. Extenuating circumstances can result in exceptions to this rule, but agreement must be reached with the instructor in advance of the assignment, or class to be missed. D2L dropboxes will close at the beginning of class on due dates, and late and improper submissions will be assigned a zero grade.

Grading Policy

Attendance	5%
Lab cleanliness	10%
Assignments	50%
Project	35%
Total	100%

Grade Conversion: A: (90-100), B: (80-89), C: (70-79), D: (60-69), F: (0-59)

Attendance (5%)

Typically, attendance is not recorded in my other classes. College is supposed to be filled with adults acting like adults. However, to get you in the habit of acting responsibly, 5% of the overall grade will be based on attendance in both lecture and lab. Late arrival to class (after your name has been called) results in a 75% attendance grade for the day.

Lab cleanliness (10%)

Each team is allocated a dedicated workspace in the lab, which is expected to remain tidy. When leaving lab, no stray items are allowed left on the workspace. A partially, or completely, built robot may remain as long as it is connected as a single piece. Any trash or spare parts left will result in a 10% point deduction from the lab cleanliness grade. A similar deduction results from losing or damaging important robotic parts such as motor leads breaking, lost sensors, etc.

Lecture Assignments (50%)

All graded assignments are weighted equally. A single submission for each team is collected for assignments marked as group submissions. Be sure to include all team members' names, but leave any names off for team members who did not contribute. Due dates for the following topics are marked in the course schedule and are due at the beginning of lecture. See D2L for more detailed descriptions of these assignments.

- 1) Pre-test (individual – see quiz on D2L)
- 2) Literature review exercise as a single JPG, DOCX, or PDF file (individual – see D2L drop box)
- 3) Personality assessment and reflection as a single JPG, DOCX, or PDF file (individual – see D2L drop box)
- 4) Personalized curriculum flowchart as a single JPG, DOCX, or PDF file (individual – see D2L drop box)
- 5) Interview of an engineer as a single JPG, DOCX, or PDF file (individual – see D2L drop box)
- 6) Visit student organization as a single JPG, DOCX, or PDF file (individual – see D2L drop box)
- 7) Energy exercise (group – hardcopy submission)
- 8) Statics exercise (group – hardcopy submission)
- 9) Circuits exercise (group – hardcopy submission)
- 10) Global engineering company as a single JPG, DOCX, or PDF file (assignment – see D2L drop box)
- 11) Controls exercise (group assignment – hardcopy submission)

When submitting assignments 7, 8, 9, and 11 as a hardcopy, be sure to write the team number/letter **and** all the team member names who contributed to the assignment. If the submission includes multiple pages, **do not** fold over the corner of the pages in an attempt to hold them together. Instead, either staple the pages together or write the names of contributing students on **every** page. Failure to follow these instructions will result in a deduction of 1 point (out of 10) from the grade.

Laboratory Assignments (35%)

The term project is a mechatronics design competition using VEX robotic systems. The following items will count equally towards the project grade. Generally, the same grade will be shared by all team members although those found not contributing to the effort may receive reduced scores. The following assignments are due at the beginning of Friday lab. See D2L for more detailed descriptions of these assignments.

- Building of the Clawbot (half points if kit not checked)
- Remote control Clawbot programmed to autonomously turn around when detecting an obstacle
- Concept sketches and decision table as a single JPG, DOCX, or PDF file (see drop box on D2L)
- Time management plan for bot build as a single JPG, DOCX, or PDF file (see drop box on D2L)
- Complete mechanical design of the prototype with moving parts controlled by remote
- Final robot competition score²
- Log of bot build activities and reflection as a single JPG, DOCX, or PDF file (see drop box on D2L)

Course Outline

Laboratory (Monday, Tuesday, or Wednesday)		Lecture (Thursday)		
Week of	Topic	Due	Topic	Due
Jan 07	VEX programming		Study skills	1) ³
Jan 14	Kit check out		Navigating campus	2)*
Jan 21	Build clawbot (no Monday lab)		Personality assessment	3)*
Jan 28	Clawbot programming	a)	Goal identification	
Feb 04	Competition reveal	b)	Coursework and curriculum	
Feb 11	Concept generation/selection		Newton's second law	4)*
Feb 18	Bot build/program/test	c)* and d)*	Dimensions and units	
Feb 25	Bot build/program/test		Energy	5)*
Mar 04	Bot build/program/test		Vectors	6)*
Mar 11	Bot build/program/test		Statics	7)
Mar 18	Bot build/program/test	e)	Circuits	
Mar 25	Bot build/program/test		PID Control	8)
Apr 08	Bot build/program/test		Dynamic systems	9)
Apr 15	Bot build/program/test		Engineering careers	10)*
Apr 22	Competition "dress rehearsal"	f) ¹	Diversity and globalization	11)
Apr 29	Kit check in (Monday only)	g)*	No lecture	

* Assignments marked in red with an asterisk are submitted in D2L dropboxes. Submissions need not be digitally produced, but must be legible, high-quality scans (i.e. not grainy images captured with smart phones) and must be uploaded as a single JPG, DOCX, or PDF file.

² The robot competition will take place in the afternoon of April 26th outside of class time.

³ This online D2L quiz is due Friday January 11 at noon.

Federal, BOR, & KSU Course Syllabus Policies

Information contained in the links below constitutes the Federal, BOR, and KSU course syllabus policies and procedures and may be referenced by faculty members in their course syllabi. These policies are updated on the Academic Affairs Website annually.

[Academic Affairs - Federal, BOR, & KSU Policies](#)

[Academic Affairs - KSU Student Resources for Syllabus](#)

Note to Faculty: The KSU faculty handbook requires the Academic Integrity Policy in the course syllabus.

Note to Faculty and Students: The Office of the Provost will work to keep the policies and links in this document as accurate as possible.

Academic Integrity Statement

Every KSU student is responsible for upholding the provisions of the Student Code of Conduct, as published in the Undergraduate and Graduate Catalogs. Section 5c of the Student Code of Conduct addresses the university's policy on academic honesty, including provisions regarding plagiarism and cheating, unauthorized access to university materials, misrepresentation/falsification of university records or academic work, malicious removal, retention, or destruction of library materials, malicious/intentional misuse of computer facilities and/or services, and misuse of student identification cards. Incidents of alleged academic misconduct will be handled through the established procedures of the Department of Student Conduct and Academic Integrity (SCAI), which includes either an "informal" resolution by a faculty member, resulting in a grade adjustment, or a formal hearing procedure, which may subject a student to the Code of Conduct's minimum one semester suspension requirement. See also [KSU Student Code of Conduct](#).

Electronic Communication

The University provides all KSU students with "official" email accounts with the addresses "students.kennesaw.edu" and "kennesaw.view.usg.edu" (in D2L). As a result of federal laws protecting educational information and other data, these are the sole email accounts you should use to communicate with your instructor or other University officials.
